

Should We Get a Credit Review by SBA?

What is a Credit Review?

Credit review is a live interview with a SBA loan officer to determine if you have what it takes to be approved for a SBA loan. Based on your financial condition and credit history, we provide you with the dollar amount and terms we think you are eligible to borrow. If you are not bankable, we will suggest alternatives for you to consider. We will point out any capital-access obstacles that you may be faced with and strategies to overcome. There is no cost for this service.

What Are The Benefits of Getting a Credit Review?

Having your credit pre-reviewed allows you to start or grow your business as an educated, informed entrepreneur. You will have a sense of direction, identified possible money hurdles, and can negotiate more confidently -- possibly savings thousands. The business community, including SBA participating lenders, sees you as an organized and serious entrepreneur that is prepared to do business in Arizona.

Does This Guarantee Us a SBA Loan?

No. This is not a loan -- rather a pre-review of your financial condition to determine if you are bankable.

How do you apply for this service?

It's simple and takes about an hour. Go to our web site at www.sba.gov/az and click on the link titled "On-Line Registrations." Open the drop down menu under Seminars and click on "SBA Credit Review" and complete the form. In a day or two, SBA will email you the forms to complete. Once completed, we will make an appointment for you to visit SBA.
